Detailed description of project						Type of services provided		
The project: - Delivers the SDI for the region of Kozani. Spatial Data/ metadata are INSPIRE compliant. Data are available on the www via OGC web Services: WMS (public), WFS/ WCS (authorized users). - Builds GIS enabled s/w applications that support local/ regional Stakeholders in their day-to-day activities (e.g. cadastral & urban planning authority, water supply authority, municipality). - Trains local/ regional Stakeholders on how to operate the SDI in their day-to-day activities. - Raises Awareness on the importance of harmonized SDIs via workshops and demonstrations that address to a wide audience: citizens, scientists etc - Builds capacities at regional level to make sure that the project outcomes will continue. Such capacities are (but not limited to): - documentation/ reporting on SDI Implementation including GIS enabled s/w applications - support and help desk - frequent seminars						- Design, implement, test and validate a SDI at regional level i.e. h/w, s/w, Spatial DB, gis enabled applications tailored to the end-user needs. - Teaching & Training for local / regional Stakeholders on the SDI in order to (i) facilitate their day-to-day activities (ii) maintain and enrich harmonized Data Infrastructure. - Awareness Raising via seminars that address to a wide audience - Land Administration & Cadastral: gis enabled applications for cadastral and urban planning - Dissemination
