Project Description						Type of Services Provided		
 <p><b>The project:</b> Member from EPSILON and of the National Technical University of Athens, NTUA, have developed under contract to the Athens Water Supply &amp; Sewerage Company, EYDAP, a web-based application, offering the Greek legislation and the European Directives on Water Environment. The database contains more than 300 acts since 1925. Every act is attributed by: database fields, title, reference code, publication year, legislation type, Greek and English abstracts, reference for abolition, reconciliation, modifications and other.</p> <p><b>The database:</b> The descriptive data is followed by the full text of the act in Greek and English. The application features include full acts reporting (e.g., by type of legislation, year of publication) and a parametric search based on keywords and meta-information. The user has the option to display or print the full text and to searching in the content of the selected acts.</p> <p>The System contains: Water and environment legislation since 1925, Greek Laws and EU Directives, 300+ Acts, Descriptive information of Acts, Original text and electronic format (pdf), English translation of the Greek acts, a cataloguing system, and a parametric retrieval. The extension of the system is planned up to 2006. It will include GIS web-based information, and a subscription to obtaining on-lime information. Users are offered a web registration for updates notifications. GIS visualization is used to depict the temporal and spatial distribution of the laws and directives in the country.</p>						<p><u>Services-Deliverables</u></p> <ul style="list-style-type: none"> <li>A complete Law database</li> <li>Internet based services</li> <li>GIS technologies for spatial knowledge</li> </ul> <p><u>Achievements-Innovation</u></p> <ul style="list-style-type: none"> <li>Linkage to GIS for visualisation</li> <li>The only database in Greece</li> <li>Linked to a legal database for 32 environment sectors, related to Greece, EU, Italy, Spain, and USA.</li> </ul> <p><u>Key Words</u></p> <p>Environment, laws, Directives, European Union, water resources, toxics, pollutants, chemicals, river basin, 2000/60, Environment Agency, Greece.</p> <p><u>For Information</u></p> <p>Prof. Marc BONAZOUNTAS  <a href="mailto:bonazountas@epsilon.gr">bonazountas@epsilon.gr</a>  <a href="mailto:bonazoun@central.ntua.gr">bonazoun@central.ntua.gr</a>  <a href="http://envirosystems.hydro.ntua.gr">http://envirosystems.hydro.ntua.gr</a></p>
