

Acronym: STATISTICA
Project, No.:

Project Title:

STATISTICA®: Statistics Database on GIS: Phare, CIS countries

Name of legal entity	Country	Overall project value [in	% carried out by EPSILON	No. of staff provided	Name of Client	Origin of Funding	Dates [start/end]	Name of partner(s) [if any]
EPSILON INTERNATIONAL SA	GREECE	0.22	100 %	20	EU	General Secretary of Research and Technologies	1994 1995	NONE

Project Description

Type of Services Provided [Outlined]

Statistica™

Based on cost-sharing development contracts signed with both, the European Commission and Government of Greece, EPSILON has produced the statistical database for the country, which has been linked to the NUTS-X geographic system of the country and the Eurostat development sectors of a country.

In addition, the system is compatible to the classifications of the National Statistical Office of Greece (ESYE) and International Industrial Coding Systems. The system is expandable to accommodate data of the private sector clients.

STATISTICA™ can be optimally linked to DIGITAL GREECE™ in order to serve multiple clients in business forecasting and sighting of offices, shops, facilities, insurance sales, and other industrial estimates.

The database and structure have been employed by the Statistical Offices of the Czech Republic, Hungary, Poland, Russia and Slovakia Republic (CopeStat™, an EC project).

In the years past, Statistica™ was offered on a CD-ROM. Today, the system is offered in connection to the GIS database and the development sectors of Greece. It offers the 2001 Census data, ranging from population, to industrial growth, water & environment. This data can be statistically analysed and depicted on both, the NUTS-X classification of Digital Greece, and the individual municipal city block disaggregating level, thus, offering a powerful statistical tool for decision making.

Services-Deliverables

- A structured database
- Methodology of Inventory of information
- GIS system (design-development)
- Economic feasibility and Pilot Application
- Statistics Delivery and Mapping.

Achievements-Innovation

1. Exposed and distributed environmental information to society, consisting of data collected
2. Structured and released a major GIS system in cooperation with ESRI-Germany

Key Words: STATISTICA, census data, NUTS, ESYE, Eurostat, GIS, Information Technology, decision making, Statistics.
