### Description

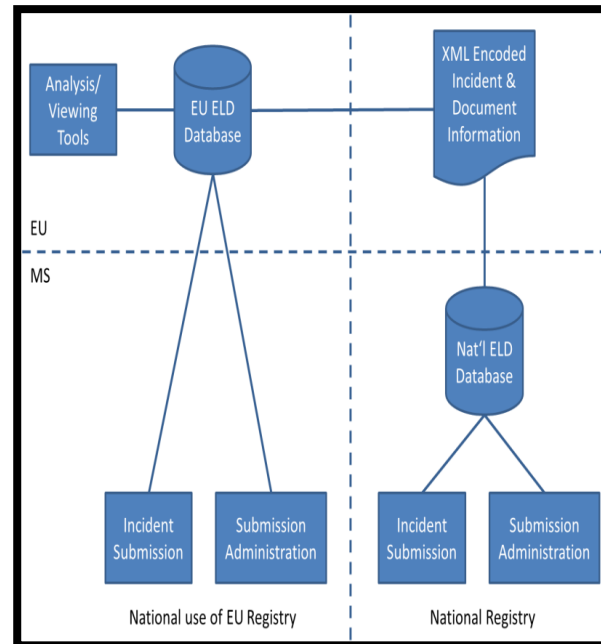

EPSILON contributed to a proposal for the implementation of REFIT actions for the Environmental Liability Directive (ELD) – Phase 1 under framework contract ENV.D.4/FRA/2016/0003.

The project aimed to improve the evidence base and support harmonized implementation of the ELD across EU Member States.

Activities included the design of a concept for a central EU-level registry of environmental damage cases, the development of guidance on key legal definitions, the creation of a capacity-building programme with training material, and the organization of expert group meetings and stakeholder workshops.

The solution involved legal analysis, data modelling and the identification of administrative tools to support implementation.

EPSILON contributed to project coordination and supported the delivery of legal, technical and dissemination components.

### Outcome

- Improved understanding of ELD implementation in Member States
- Developed concept for a central EU-level ELD Registry
- Produced training material and support tools for authorities and stakeholders
- Prepared guidance on key ELD definitions and application
- Organized expert meetings and stakeholder workshops
- Delivered communication and dissemination material
- Contributed to preparations for future ELD
